Subject Index of Volume 160

Annular seals
importance of heat transfer from fluid film to stator in turbulent flow annular seals, 269

440C Ball bearing steels
friction and oxidative wear of 440C ball bearing steels under high load and extreme bulk temperatures, 37
Ball mill wear
modelling and simulation of ball mill wear, 309

Ceramic coatings
analysis of the friction and wear mechanisms of multilayered plasma-sprayed ceramic coatings, 201
Ceramic tools
wear mechanism of ceramic tools, 227
Chip breakability
the effects of progressive tool wear and tool restricted contact on chip breakability in machining, 243
Chromium coating
improvement of tribological properties at high temperature of chromium oxide coating by solid lubricants, 181
Cold forging
a finite element approach to plasto-hydrodynamic lubrication in cold forging, 163
Complex coatings
structure of complex coatings, 67
Conical method
measurements of real surface area by the conical method and fractal approach, 265
Contact stiffness
assessment of tangential and normal stiffness of contact between rough surfaces using ultrasonic method, 253
Corrugated thrust bearings
on study of corrugated thrust bearings, 13
Cr_2O_3 coatings
effects of additives on friction and wear behaviour of Cr_2O_3 coating, 61

Erosion of composite
erosion of an aligned alumina–stainless steel composite, 345

Finite elements
a finite element approach to plasto-hydrodynamic lubrication in cold forging, 163
Fractal approach
measurements of real surface area by the conical method and fractal approach, 265
Fretting
the effect of number of cycles on the critical transition boundary between fretting fatigue and fretting wear, 279
Fretting fatigue
a fretting fatigue normal pressure threshold concept, 33
Friction loss computation
die verluste wegen der reibung in radial-axial-kugellagern bei hohen drehzahlen, 51

Grain refinement
influence of grain refinement on the high temperature fretting behaviour of IN 738 LC, 361
Grinding
strength and residual stress of Mg-PSZ after grinding, 301

Heat transfer
importance of heat transfer from fluid film to stator in turbulent flow annular seals, 269
High speed angular ball bearings
die verluste wegen der reibung in radial-axial-kugellagern bei hohen drehzahlen, 51
Hydrostatic bearing
theoretical and experimental research of dynamic transient characteristics of hydrostatic bearing, 27

Image analysis
measurement of surface roughness on rough machined surfaces using spectral speckle correlation and image analysis, 221

Journal bearings
a study of mixed lubrication parameters of journal bearings, 111

Low-lubricity fuels
wear with low-lubricity fuels. I. Development of a wear mapping technique, 325
wear with low-lubricity fuels. II. Correlation between wear maps and pump components, 333

Machine element application
wear mechanisms and tribological performance improvement of steels after surface treatments for machine element application, 139
Machining
the effects of progressive tool wear and tool restricted contact on chip breakability in machining, 243
Magnetic field
wear of metals in a magnetic field, 119
Magnetic media
lubrication mechanism of phosphite and thiophosphite on the magnetic thin film media, 125
Mg-PSZ
strength and residual stress of Mg-PSZ after grinding, 301
MoS_2 coatings
predicting the friction and durability of MoS_2 coatings using a numerical contact model, 171
Multi-phase materials
multi-phase materials and their surface contact behaviour with reference to friction and wear, 213

Normal pressure threshold concept
a fretting fatigue normal pressure threshold concept, 33
Numerical algorithm
model and numerical algorithm for sliding contact between two elastic half-planes with frictional heat generation and wear, 77

Numerical contact model
predicting the friction and durability of MoS_2 coatings using a numerical contact model, 171

Oxidative wear
friction and oxidative wear of 440C ball bearing steels under high load and extreme bulk temperatures, 37

Particle trajectories
a model of particle velocities and trajectories in a slurry pot erosion tester, 95
Particle velocities
a model of particle velocities and trajectories in a slurry pot erosion tester, 95
Phosphite
lubrication mechanism of phosphite and thiophosphite on the magnetic thin film media, 125
Plasto-hydrodynamic lubrication
a finite element approach to plasto-hydrodynamic lubrication in cold forging, 163
Polyetheretherketone
the investigation of the action of fillers by XPS studies of the transfer films of PEEK and its composites containing CuS and CuF_2, 131
Polyurethane layers
start up and steady state friction of thin polyurethane layers, 191
Pump components
wear with low-lubricity fuels. II. Correlation between wear maps and pump components, 333

Rubber
friction and wear of rubber-like materials, 1

Sand slurry erosion
a study of sand slurry erosion of W-alloy white cast irons, 259
Shear tractions
the effect of shear tractions on frictionally-excited thermoelastic instability, 237
Sliding contact
model and numerical algorithm for sliding contact between two elastic half-planes with frictional heat generation and wear, 77
Slurry pot erosion tester
a model of particle velocities and trajectories in a slurry pot erosion tester, 95
Solid lubricant coatings
effect of low temperatures on the wear mechanism of solid lubricant coatings in vacuum, 351
Solid lubricants
improvement of tribological properties at high temperature of chromium oxide coating by solid lubricants, 181
Spectral speckle correlation
measurement of surface roughness on rough machined surfaces using spectral speckle correlation and image analysis, 221
Steels
wear mechanisms and tribological performance improvement of steels after surface treatments for machine element application, 139
Surface area
measurements of real surface area by the conical method and fractal approach, 265
Surface contact
multi-phase materials and their surface contact behaviour with reference to friction and wear, 213

Thermoelastic instability
the effect of shear tractions on frictionally-excited thermoelastic instability, 237
Thiophosphite
lubrication mechanism of phosphite and thiophosphite on the magnetic thin film media, 125
Thrust bearings
an analysis of sector-shaped thrust bearings operating in the transition regime, 291

Ultrasonic method
assessment of tangential and normal stiffness of contact between rough surfaces using ultrasonic method, 253

Wear improvement evaluation
wear improvement evaluation of non-homogeneous surface modified materials, 105
Wear mapping
wear with low-lubricity fuels. I. Development of a wear mapping technique, 325
Wear maps
wear with low-lubricity fuels. II. Correlation between wear maps and pump components, 333
Wheel sharpness
wheel sharpness measurement for force prediction in grinding, 317

XPS studies
the investigation of the action of fillers by XPS studies of the transfer films of PEEK and its composites containing CuS and CuF_2, 131

Zirconia ceramics
environmental effects on wear and friction of toughened zirconia ceramics, 153
